

### **Summary of Opportunity**

WeCare Clinic – Medical Care for Special Needs (WeCare Clinic) is seeking a Medical Director/Physician to join our practice. The Medical Director/Physician’s responsibilities include management of quality of care, delivery of medical care, community outreach/research, and administration.

The successful candidate will have the opportunity to practice highly-personalized medicine in a well-supported, community clinic in a rural landscape. WeCare Clinic is in Pembroke, Kentucky amongst a large Anabaptist (Amish and Mennonite) community. Kentucky is the eighth largest state with an Anabaptist population exceeding 12,600. Pembroke is conveniently located 15 minutes from Hopkinsville, Kentucky, 30 minutes from Clarksville, Tennessee and only 1 hour from Nashville, Tennessee. Our location offers high-quality of life, a multitude of state and national recreational areas, numerous farmers’ markets, and allows for short commutes to affordable housing and high-quality schools in both rural and suburban communities.

### **About WeCare Clinic**

WeCare Clinic is organized as a 501(c)3 nonprofit organization to provide diagnostic and out-patient medical care for children and adults with genetic disorders. WeCare Clinic’s mission is to improve the quality of life for families with genetic disorders through medical care, education, and research. WeCare Clinic is modeled after other successful genetic medical clinics which are located in Anabaptist communities in Delaware, Indiana, Ohio, Pennsylvania, and Wisconsin. The development of these medical clinics is revolutionizing access to medical services for the traditional Anabaptist community. Many families in Kentucky will look to WeCare Clinic to help care for their children and adults with metabolic disorders and other inherited conditions. WeCare Clinic will provide on-going care to this special needs population with staff trained to address the special needs of individuals suffering from genetic disorders and manage the often-complex care.

### **Qualifications**

- MD/DO and licensed as physician in the state of Kentucky
- Board certified in family medicine or med-peds
- Five years of experience beyond residency training
- Interest in biochemical/community genetics is preferred
- Experience in serving patients in rural, underserved settings including, but not limited, to Anabaptist families is preferred
- Demonstrated commitment to providing compassionate, culturally sensitive, cost-effective care
- Experience using Electronic Health Record/Electronic Medical Record

- Ability to communicate effectively both orally and in writing with diverse audiences
- Administrative or supervisory experience is preferred
- Occasional travel is required

**Benefits**

- Full-time, primarily daytime out-patient care
- High quality work-life balance
- Opportunity to serve families with special health needs
- Competitive salary, 403b retirement package, insurance benefits, paid time off, and paid holidays

**To Apply**

If you have a heart to serve others and the desire to help serve families with special health needs, please send a letter of interest, CV, salary requirements, and contact information for three professional references to:
